

# UNIVERSAL REPLACEMENT PADS

## for Polarized Electronic Air Cleaners

This high quality replacement fiberglass pad (collector cushion pad) is **universal**. It fits most electronic air filters, with polarized media pads.

**This pad has no glue**, the seams are stitched. This is better for the environment and the seams are firmer with stitches.

### **For all of the pads, follow steps 1 – 5:**

Step 1: Turn off the power on the air handler.

Step 2: Open the air handler filter access.

Step 3: Unplug the 24 volt power cord from the power head.

Step 4: Remove the air cleaner panel.

Step 5: Open the air cleaner and remove the old collector cushion pad and discard.

**Electro Breeze Air Cleaner:** To replace the collector cushion pad in the Electro Breeze model, slide the electrode into the tubing inside the cushion, close the air cleaner and plug the 24 volt power cord into the power head.

**PremierOne Products Air Cleaner:** To replace the collector cushion pad in the PremierOne air cleaner, slide the electrode into the tubing inside the cushion, close the air cleaner and plug the 24 volt power head cord into the power head.

**Air Screen 1200 Air Cleaner:** To replace the collector cushion pad in the Air Screen 1200 model, open the pad at the seams on one side and slide the pad over the screen, enveloping the screen. Make sure the connecting plate touches the carbon or mesh inside the pad.

**Dynamic Air Cleaner:** To replace the collector cushion pad in the Dynamic model, replace with the new collector cushion pad, making sure the pad fits snug on all sides. You do not need to fuss with the small tubing; the elbow electrode will automatically pierce through and touch the center screen of the pad.
