

ALL ONE HOUR® IAQ PRODUCTS COME WITH A 100% SATISFACTION GUARANTEE

# MicroPower Guard® Diamond

**New Diamond Cut Aluminum Screen!\***  
Larger holes- particles hit the media not the screen!

**New Scrim Process!** Fibers stay more intact; cleaner look, better fit!

High-Output Power Source With **Lifetime Warranty!**

**Easy Maintenance!** No washing or chemical cleaning required! Eco-friendly replacement pads take moments to change!

The **MicroPower Guard® Diamond** air cleaner uses polarized media technology, which generates an active electromagnetic field to charge both the airborne particles and the fibers of the disposable carbon-filled media pad. Polarized particles stick to both the media and to each other. This creates a virtual force field within the ductwork, capturing 97% of the most dangerous-to-breathe submicron airborne particles at 0.3 microns.\* The **MicroPower Guard Diamond** is your first step in improving the indoor air quality of your home and is an essential component of any whole-house air purification system.

- **Economical Operation!** Diamond screen alleviates “facing loading” for better air flow.
- **Powerful air filtration for the price of a 40 watt light**
- **Activated carbon center of the disposable media pad helps absorb odors and gases**
- **Not just a passive furnace filter, but a combination of two principals: filtration and electrostatic attraction**
- **Fits easily into your existing one-inch furnace filter area**
- **Replacement media pads available in economical three-packs and four-packs**
- **Each disposable media pad remains at peak operating efficiency for three to four months before replacement is needed\***

The EPA has ranked indoor air pollution among the top five environmental dangers to the public. EPA research shows that indoor air can be two to five times more polluted than the WORST outside air. Danger Level 1 consists of allergens and particulates such as dust, pollen, mold, fungi, mildew, dust, mites, pet allergens, insect debris and tobacco smoke. One Hour® IAQ products are designed to contain, control and in some cases, eliminate the causes of indoor air pollution.
